

Pozivamo vas na **Znanstveni utorak** koji će se održati **25. ožujka 2022.** u **13:00** kada će **dr. sc. Ivana Rukavina** održati predavanje na temu

## **Evaluation of macroeconomic outcomes and seven-year membership of Croatia in the European Union**

Prezentaciju možete pratiti putem *Zoom* platforme na idućem linku:  
<https://zoom.us/j/94647026812>, Meeting ID: 946 4702 6812

### **Sažetak:**

The paper evaluates Croatia's seven-year membership in the European Union, based on selected macroeconomic indicators, using the methodological approach of counterfactual analysis, and a synthetic control method. The results show that the effect of accession stimulated economic growth and components of aggregate demand, income, savings and sectoral productivity. Also, strong disturbances with the onset of the crisis in 2009 were detected, the effects of which ultimately had a negative consequence in terms of more successful economic integration. Accession to the EU halted the decline in macroeconomic indicators and began a mild, but still insufficient recovery. The research confirms a strong trend of export development after 2013, strong turn and increase in savings, strong and significant decline in the value added of the agriculture sector, as well as unrecovered consumption. The positive effect in the reduction of government expenditures is also expressed.

### **O predavačici:**

Dr. sc. Ivana Rukavina predavačica je na Effectus poduzetničkom studiju – visokom učilištu u Zagrebu, Hrvatska. Doktorirala je 2018. na Ekonomskom fakultetu Zagreb. Njezin znanstveni i istraživački rad usmjeren je na područja ekonomskih ciklusa, ekonomskog rasta i makroekonomskih modela, ekonomskih integracija te fiskalne i monetarne politike. Usavršavala se kroz sudjelovanja na raznim radionicama i seminarima iz područja primijenjene ekonometrije, panel analize i prostornog ekonometrijskog modeliranja, kao i metoda eksperimentalnog istraživačkog dizajniranja.
