

Poštovani,

pozivamo vas na Znanstveni utorak koji će se održati **19. prosinca 2018.** godine (srijeda) u Ekonomskom institutu, Zagreb, I. kat, s početkom u 14:00 sati. Izlaganje će održati **István János Tóth** i **Miklós Hajdu** na temu:

Corruption Risks, Intensity of Competition and Performance of Winner Firms: An Empirical Analysis of Public Tenders

Iz sažetka rada koji će biti predstavljen:

We examine empirically the links of corruption risks, intensity of competition and the performance of winner companies based on a unique database built by the Corruption Research Center Budapest (CRCB), which contains data of more than 200,000 public procurement contracts between 2005 and 2017. During the analysis, we make a statistical comparison of the corruption risks, intensity of competition, strength of price competition, and total factor productivity between the groups of contracts won by different groups of companies. We use indicators of corruption risks and intensity of competition (e.g. number of bidders, type of procedure, relative contract price to estimated value) to quantify the level of corruption risk and the strength of competition. Additionally, we compare the Hungarian results with the results of public tenders in Zagreb.

István János Tóth viši je znanstveni suradnik na Ekonomskom institutu Mađarske akademije znanosti u Budimpešti i glavni direktor organizacije Corruption Research Center Budapest (CRCB). Njegovi glavni istraživački interesi su problemi korupcije i ekonomskih institucija, siva ekonomija i porezna evazija.

Miklós Hajdu doktorski je student na Sveučilištu Corvinus u Budimpešti i istraživač u organizaciji Corruption Research Center Budapest (CRCB). Njegovi glavni istraživački interesi su metodološki problemi pri prikupljanju i analizi podataka. Također je zainteresiran za istraživanje korupcije, sive ekonomije, rentijerskog ponašanja i kvalitete upravljanja.

Zahvaljujemo na odazivu.
